

BANKING SOLUTIONS - SRI LANKA

People's Bank is a state-owned commercial bank in Sri Lanka which provides Personal, Corporate, Overseas, Development and Commercial banking services. 2nd largest State Bank in Sri Lanka, where branches are located all over the country.

CHALLENGE

Under the concept of Digital Banking, automate all the banking services.

Use of Legacy Systems developed in different platforms by different vendors.

Decentralized set of applications with lack of integration

Lack of application transparency and communication between departments.

Need to cater over 750 branches in Sri Lanka

CORE TECHNOLOGY USED:

SOLUTION

Re-write all these applications in a single language with novel features and bring them to one platform. (Intranet, Pawning, Safety locker, Inventory, Maintenance, etc) AD supported Bank's first ever centralized web-based application portal with single sign-on Separate report module, Dashboards, specific authentication/authorization process, User role handling, scheduled user synchronizations, autonomous communication, notifications/reminders and audit trailing.

RESULT

Streamlined communication in branches and department communication with increased the visibility. Users actively involve with new system features due to minimum manual tasks. Application security and audit mechanisms (reports, logs, transaction history) are improved. Business monitoring through reports and dashboards. GL transaction logics can be configured without major implementations
